Professional Summary

Software Developer with 3+ years of experience building production systems with Python, TypeScript, NestJS, FastAPI, and Kotlin. Experienced in microservices, Kafka, Redis, PostgreSQL, and AI/LLM integration. M.Sc. Computer Science student at the University of Bonn, seeking a Werkstudent or part-time position in Software or AI Engineering.

Technical Skills

Languages: Python, TypeScript, JavaScript, Kotlin, Java, Go, SQL
Backend: FastAPI, NestJS, Django, Spring Boot
Databases: PostgreSQL, MongoDB, Redis
Messaging: Apache Kafka, RabbitMQ
DevOps: Docker, Docker Compose, Nginx, AWS S3, Linux
Testing & Tools: Jest, Pytest, Git, Swagger/OpenAPI, Sentry

Work Experience

Software Developer — Smartech Oct 2025 – Aug 2026

- Developed and optimized backend features for InTrack (intrack.io), a large-scale marketing automation platform.
- Led the migration of backend services from Kotlin to Python and Go, using Claude Code for large-scale code analysis, refactoring, and implementation.

Software Developer — Medic Metaverse (Contract) Aug 2025 – Nov 2025

- Developed Django microservices integrating PostgreSQL, Redis, Kafka, and object storage.
- Integrated the ChatGPT API (OpenAI) to power AI-driven features.
- Contributed to the secure handling of sensitive health-related data.

Software Developer — TOPS Oct 2023 – Sep 2025

- Designed and maintained backend services using NestJS and Python across microservice and monolithic architectures.
- Implemented asynchronous Kafka-based communication, Redis caching, and optimized PostgreSQL queries for high-traffic endpoints.
- Built WebSocket-based real-time features and containerized services using Docker and Docker Compose.
- Developed unit and end-to-end tests with Jest and contributed to domain modeling and architectural decisions.

AI Intern — Asr Gooyesh Pardaz Jun 2023 – Sep 2023

- Trained FastSpeech and VITS models for Persian text-to-speech synthesis using Python.
- Built demo interfaces with Gradio and Telegram bot integrations.

Selected Projects

Tapsi Garage – Web Application: Backend for a multi-role garage management system using NestJS, MongoDB, Redis, and Kafka; automated reporting and secure data handling.
Stonade – Marketplace Platform: Bilingual stone marketplace built with NestJS, MongoDB, Redis, and Kafka; deployed via Docker Compose and Nginx; migrated to AWS for international deployment.

Education

M.Sc. Computer Science - University of Bonn, Germany Oct 2026 – Sep 2028

M.Sc. Computer Engineering - Sharif University of Technology Oct 2025 – Aug 2026
Coursework completed; GPA: 18.2/20 (4.00/4.00)

B.Sc. Computer Engineering Oct 2020 – Apr 2025
Amirkabir University of Technology (Tehran Polytechnic)
Overall grade: 18.75/20 – broadly equivalent to the German grade "sehr gut" (very good).

Languages

German — B1 (currently improving)
English — C1 (TOEFL iBT 102)
Persian — Native
