Professional Summary

Backend Software Engineer with 3+ years of experience building scalable, production-grade systems using FastAPI, NestJS, and Kotlin. Passionate about LLMs and AI-powered applications — integrating the Claude API, building agentic workflows, and leading AI-assisted large-scale migrations. Incoming M.Sc. CS student at University of Bonn seeking a Werkstudent or part-time Backend/AI Engineering role from October 2026.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, Kotlin, Go, SQL

Backend: FastAPI, NestJS, Spring Boot, Django

AI & LLM: Claude API (Anthropic), ChatGPT API (OpenAI), LLM Integration, Prompt Engineering, AI Agent Design

Databases: PostgreSQL, MongoDB

Messaging & Caching: Kafka, Redis, RabbitMQ

DevOps & Cloud: Docker, Docker Compose, Nginx, AWS S3

Testing & Tools: Jest, Pytest, Git, Swagger, Sentry, Linux

Work Experience

Software Developer — Smartech

Oct 2025 – Present

- **InTrack** (intrack.io): developed features and performance improvements on one of Iran's largest marketing automation platforms (Kotlin); led codebase migration to Python and Go using **Claude Code** (Anthropic).

Software Developer — TOPS

Oct 2023 – Sep 2025

- Designed and maintained backend services using NestJS and Python across microservices and monolithic architectures.
- Implemented Kafka-based async communication, Redis caching, and optimized PostgreSQL queries for high-traffic endpoints.
- Built WebSocket-based real-time features and containerized services with Docker and Docker Compose.
- Wrote unit and end-to-end tests (Jest); participated in domain modeling and architecture decisions.

Software Developer — Medic Metaverse (Contract)

Aug 2025 – Nov 2025

- Developed Django microservices integrating PostgreSQL, Redis, Kafka, and object storage.
- Integrated ChatGPT API (OpenAI) to power AI-driven features within the application.
- Contributed to secure handling of sensitive health-related data.

AI Intern — Asr Gooyesh Pardaz

Jun 2023 – Sep 2023

- Trained FastSpeech and VITS models for Persian text-to-speech using Python.
- Built demo interfaces with Gradio and Telegram bot integrations.

Selected Projects

InTrack — Marketing Automation Platform

intrack.io

- One of Iran's largest marketing automation platforms; contributed features, performance improvements, and AI-assisted migration from Kotlin to Python/Go using Claude Code.

Tapsi Garage Web Application

- Backend for multi-role garage management using NestJS, MongoDB, Redis, and Kafka; built automated reporting and secure data handling.

Stonade Marketplace Platform

- Bilingual stone marketplace with NestJS, MongoDB, Redis, and Kafka; deployed via Docker Compose and Nginx; migrated to AWS for international deployment.

Education

M.Sc. Computer Science (Starting October 2026) — University of Bonn, Germany

B.Sc. Computer Engineering (GPA: 18.75/20 — 3.92/4) — Amirkabir University of Technology (Tehran Polytechnic)

Languages

English — Full Professional Proficiency (TOEFL iBT 102) German — A2 (Currently improving) Persian — Native
